From the publisher... From Ernie Cooper: "Long-time NRC'er Peter Clarius passed away on or about February 12. He had a member of the National Radio Club for about 57 years. Peter had

been to several NRC conventions, and he was prominent in the '50's when New York area members had get-togethers. He brought the late Bernie Duffy, also a Staten Islander, to many of these gatherings; Bernie was confined to a wheelchair. Pete was at last year's NRC convention in Merrimack, NH and thoroughly enjoyed himself. His vast collection of verifications were brought to my home in Provincetown, from which they will be sent to the Committee to Preserve Radio Verifications. Pete died of a heart attack suffered when he was shoveling snow from his walkway. He was 80. He was a very religious person, donating to several churches, including the Pillar of Fire, and their radio stations KPOF - Denver and WAWZ - Zarephath, NJ. May he rest in peace."

Ken Chatterton informs us that any DX'er who had not received a verie from the KDLA-1010 CPC test of January 15, 1994, by mid-April should send a copy of their verie request to him for forwarding. Seems that the new engineer found a box full of verie requests and contacted the NRC for help. Ken is designing QSL cards which were to be forwarded to KDLA. He adds that verie requests should not be sent to the station.

1660 ---- NV Las Vegas: once again this year, during the NAB Convention, USA Digital will be running a station here to demonstrate digital radio. They are going to use a Harris DX10 transmitter which, if run at full power, will pump out 10 kilowatts. This frequency might be worth watching from April 10th through the 13th. Since they expect to be able to demonstrate a comparison between conventional and digital AM signals we assume this means there will be analog information on this frequency which you can receive with conventional equipment.

DDDX-West MEDIUM WAVE RAMBLINGS

- ✓ We welcome new reporter Craig Rathbone of Denver, who, with KKFN still off, is cleaning up on 950. Shawn sez: "Lots of snow. Had to do the 1500-1600 foot walk in ankle-to-knee deep snow. Builds character, they say. Should get some of you Southerners up for a real DXpedition some time. You all do have woolies and big old warm boots, don't you?" Na. Don't need those wimpy things, really. So, I vote for Winnipeg for the '96 convention!!! The first week of September is still snow-free there, isn't it? Thanks to Mike Sanburn for enclosing some circa-1970 KHJ music surveys. Great stuff. U gottem more? Word off the Internet is that WGN-720 has acquired 100% of Interstate Radio Network's stock. The company said "the Interstate Radio Network will be a subsidiary of Tribune Radio Networks, a division of WGN-AM Radio, which is owned and operated by Tribune Broadcasting. Interstate Radio is a syndicated radio program targeted to cross-country truckers. Tribune said the network, launched in 1988, now has more than 50 affiliate stations nationwide. The network broadcasts five hours of programming a night, seven nights a week, the company said."
- ★ Lots of E-Mail reports in this time. Please format just as you see here. Then it's just a cut-n-paste for me. Thanks. Good to hear from Gerry Thomas, via the Internet, back from vacation in the middle-east. Right. No report, just a check-in. And Doug Smith relayed an E-Mail report he received from Elliott Forrest with a station list for *The Late Late Radio Show with Tom Snyder and Elliott Forrest*. Does TS do a radio show in addition to his post-Letterman CBS gabber? just in case, the list is being forwarded to Topeka.
- ♦ Setting a good example for all GY chasers, Richard Turner updates his totals . . . plus bags a record for himself. And Carl Dabelstein claims a few more GY records, plus a few ties.
- ✗ Deadlines for DDXD-West for the remainder of Volume 62: Issue 24 - March 25; Issue 25 - April 8; Issue 26 - May 6; Issue 27 - June 3; Issue 28 - July 1; Issue 29 - July 29; Issue 30 - September 2. These are all Saturday deadlines, for postal delivery. E-Mail reports as late as the following Sunday morning will be picked up, too.

- 620 KOTK **OR** Portland - 2/22 2300 - After noting call change (ex-KINK) in AM Switch, heard with Super Talk 620. Had local talk with ABC News on the hour. (BR-CA)

- 820 WSCR **IL** Chicago - Group W Radio, has signed an agreement to acquire this sports outlet, as well as WXRT-FM. The sale is subject to FCC approval. [Internet]
- 830 KOTC **MO** Kennett - 2/14 0655-0710 - C&W music & slogan: "Cotton Country". Change yo' Logs. (DE-MO)
- 950 WJEM **IL** Chicago - 2/19 0105 - Fair signal, with rap music [oxymoron #304, hi - Ed.] and 106 Jams IDs. Under WWJ and CFAM. New calls. New for both of us!! (MBDXP)

- KOTD **NE** Plattsburgh - 2/18 1735 - Fair, with John Denver and other MOR-type music. // KOEL-1540 [same bird feed - Ed.]. IDs as AM 1020 KOTD. Ex: 1000. New for both of us!! (MBDXP)
- 1250 KQYN **CA** Twenty-Nine Palms - 2/11 1305 - Ex: KDHI. Rock music by Eagles, Aerosmith, Doobie Bros., & Eric Clapton. Ads for Sears and Plaza Market. 1328 ID: *The Morongo Basin's only quality rock*, Q-Rock 1250 AM. (MS-CA*)
- 1290 KLEH **IA** Anamosa - Per visit with Rick Sellers at WMT, this station went silent for good at 1200 CST on 2/21. Apparently, the owner was having big money problems (i.e., lack of sponsors), and indicated as much during an emotional final sign-off. DXer Neil Griffin told me KLEH was on "life-support", running satellite C&W, so its demise isn't too surprising. 1290 here in the daytime is now ruled by WIRL and nobody else. (RD-IA)
- 1410 WHLN **KY** Harlan - My letter to the 110 N. First St. #300 address in de Log was returned. Per phone chat with secretary, all letters to WHLN should be mailed to P.O. Box 898. Zip remains the same. (RD-IA)

UNIDs and UNID HELP

- 540 UNID ?? - 2/19 0215 - Very poor, under XEWA, with *American Talk Program*. Maybe WWZN. (MBDXP)
- 910 UNID ?? - 2/27 0619 - With WSUI nulled as much as possible, I caught a weak signal of black GOS and a DJ's mention of CLs that sounded like . . . VIS. Only thing that comes close is KBIS in Miami, OK, towards which my RW loop was pointing, but de Log sez KBIS doesn't sign on until 0700. (RD-IA)
- 1400 UNID ?? - 2/11 0015-0030 - Women singing in unknown ?Asian/Pacific/ Native American? language. This was not local KVTO, which I had nulled. No recognizable ID. Loop oriented NE/SW to null KVTO. (RH-CA)
- 1500 UNID ?? - 2/18 1820 - Fair, with Notre Dame basketball network. Over/under KSTP. (MBDXP)
- 1550 KQFN **ND** West Fargo - M Street of 2/2/95, confirms that this is the correct call on this station. (GC-NY)
- 1580 WHLY **IN** South Bend - Confirmation on Rocky Stone's unID solved. I was recently in South Bend, and indeed did note WHLY with the *Radio Hollywood* slogan, and NOS. (GC-NY)

1700 KQRS

MN Golden Valley - 2/18 2315 & 2/19 0813 - Poor-to-fair signal with AOR music and lots of ads for Minneapolis Motorcycle Show and a Ford dealer. 92 KQRS IDs. This is the mystery station from a prior report [IDed last issue by Jon Ellis - Ed.] and must be the first in the new band. (MBDXP) [No. Just sloppy engineering - Ed.]

DX AND EQUIPMENT TESTS

730 KWRE- MO Warrenton - 2/18 0100-0130 - Not a sign. KCBS-740 sloop very bad. Managed to detect very faint C&W music in noise. Later detected what sounded like two different SS stations. (BK-CA) No chance! WBBI here in Hometown, USA is too much. (NAP-AL)

750 KERR+ MT Polson - 2/20 0200-0230 - Heard loud & clear at start. Later faded back into noise and could hear Morse code and CW Mx. KCBS-740 sloop bad, also KXL & a sports talk station heard. (BK-CA)

KERR+ MT Polson - 2/20 0200-0230 - Clearly heard CIDs and VIDs. Mentioned 1-800# and called at end of test. Good signal; about equal to KXL. (FA-ID)

KERR+ MT Polson - 2/20 - Heard with CID @ 0203, another CID and VID @ 0210. Good signals on peaks, but QRM from usually dominant KOAL and unID SS. Thanks J.D. Stephens and Tom Bryant! (HH-CA)

KERR+ MT Polson - 2/20 0208-0220 - CID at 0208, then fade. Back with CID at 0215, then VID including location. WSB nulled. (BBMcC-TX)

KERR+ MT Polson - 2/20 0200-0230 - Logged and taped, over KOAL and KAMA, with numerous voice and code IDs. Some C&W songs heard also. Called 1-800-750-5377 to say "thanks for the test." (MS-CA)

KERR+ MT Polson - 2/20 0200-0230 - Very strong with CIDs and VIDs with C&W music. Gave an 800 number to call if you are hearing this test. (CR-CO)

KERR+ MT Polson - 2/20 0100-0110 - Weak, with CIDs and C&W during this stretch; signal was constantly getting skewered by WSB, so no report sent. (RD-IA)

KERR+ MT Polecat - 2/20 0200-0230 - KFQD taking charge of frequency for the most part at 0200, but KXL in very tight SE null. 0202-0203 very weak tones, "R R" copied a couple of times. Way underneath KXL. 0221 very weak unID female vocal selection, way under KXL. Recheck at 0230, with only KFQD/KXL. Since I'm a stickler for full VID/CID, I'm not claiming total victory. In the "tentative" category. (RO-AK)

780 WWOL- NC Forest City - 2/11 0100-0140 - Not heard. Not even a trace. Only local WBBM (KO-IL) Nothing heard, and did not expect to. (FA-ID)

910 KIYU- AK Galena - 2/6 0500-0530 - Nothing heard. Had high hopes for this one. (FA-ID)

1100 KNZZ- CO Grand Junction - 2/12 0300-0330 - Nothing heard that sounded like a test. This is usually a regular, so am a little surprised. Was it on? (FA-ID)

1210 KGYN+ OK Guymon - 2/13 0200-0230 - Heard at good level with usual IRN programming, but no test announcements, TTs or code noted. (MS-CA)

KGYN? OK Guymon - 2/13 0200-0230 - Heard some tones, but no CIDs. This station is usually a regular. Was the test on? (FA-ID) [One prior report indicated hearing "regular programming", unlike a "real test", so...? - Ed.]

1250 WREN+ KS Topeka - 2/14 0100-0200 - Clearly heard CIDs in a mess. Fair signal. (FA-ID)

1330 WPPI+ GA Carrollton - 3/4 0502-0556 - Weak-to-fair, under WFBC/KPH/KWLO with CIDs in varying pitches. At 0517, called Bill Alisauskas, who was glad to hear from me. (RD-IA)

1330 WPPI- GA Carrollton - 3/4 0550-0600 - Not heard. KUPL dominant. (FA-ID)

1340 KTCR+ WA Kennewick - 2/26 0430-0500 - Heard running tones and weak VIDs. (FA-ID)

KTCR- WA Kennewick - 2/26 0400-0500 - Not heard. I thought I heard bits of tone a couple of times, but no code IDs or anything else I could latch on to. KTK and the Spanish-language station from Reno were best on the channel. (BR-CA) 0424-0431 - Not heard. Just typical Graveyard jumble. Maybe a tone once. (BK-CA)

1410 WHLN KY Harlan - 2/7 0459-0504 - Fair-to-good, with TTs and announcement by male during monthly frequency check. (RD-IA)

1420 KUJ+ WA Walla Walla - 2/26 0400-0505 - Some voice IDs and varied tones were heard, from poor-to-fair, with interference from the Mexican and lots of KNTA splatter. I heard them better on regular schedule a week ago. (BR-CA)

KUJ+ WA Walla Walla - 2/26 0401-0423 - Heard poorly at first, then by 0412 got very loud. Talk, tones and music. (BK-CA)

KUJ+ WA Walla Walla - 2/26 0509-0600 - Dominant. Taped and reported. IDs mentioned Talkradio KTCR and KUJ conducting a DX test sponsored by the IRCA. Narrated tone progression and address given. (MS-CA)

KUJ+ WA Walla Walla - 2/26 0400-0430 - Announcement that they were running the test for IRCA (simulcast with KTCR). Even with everybody else. Gave address several times. Asking for reports. Tape sent. (FA-ID)

1420 KUJ+ WA Walla Walla - 2/26 0400-0430 - Weak, with tones heard four times during this stretch, the strongest of those coming at 0420, when it changed pitch several times. Thanks to Frank Aden, Jr. (through Ye Editor) for confirming this. WA #3 here. (RD-IA)

1580 KDFE- AR Ft. Smith - 3/4 0200-0300 - Tried, but nothing heard. (FA-ID)

DDXD-East NEWS AND VIEWS

Another good batch of new reporters, as we welcome Steven Paradies from Charlottesville, VA, Matt Sittel from Asheville, NC, Aaron Reed from Brockton, MA, and some UNID help from Edward Soule of Owens Cross Roads, AL. Steve says he has been an NRC member for almost 15 years and has recently been hit by the "bug" big time despite the noise in his apartment building. Matt is a new member, just invested in a Superadio III and is very impressed. Matt lives on the ground floor of his apartment building, but is on a hill at elevation 2,080!

Denis Picard contributes his first report since obtaining a new Quantum Loop, and says he is very impressed by its performance. In response to a question posed by Russ Horton, yes both WGMP-1210 and WIP-610 are sports talk in Philadelphia. Thanks to Dale Patterson for the sticker. Morris Sorenson sends along some logs from the ODXA DXpedition to Don Trelford's resort villa at Runaway Bay, Jamiaica. I guess it's one of those things they really had to be talked into!

And from Greg Coniglio: On 3/1 at 2325 tuned in to WWWE to just hear the end of a conversation with a caller from Finland who was picking them up! I heard the tail end of a sentence where the caller said that he can receive quite a few U.S. and Canadian stations in Finland in the winter, interesting! Wonder if it was an NRC member, or a prospective one! Too bad I tuned in at the end.

Sorry to all affected, but I had to edit a little more than usual due to the length of this column. If you submitted something that didn't show up, and you think it should, let me know and I will include it next time. Upcoming deadlines are March 25, April 8 and May 6.

SPECIAL

530 CIAO	ON Brampton - Still on 530, and won't be moving to 1430, although the 1995 WRTH has them on 1430! Either the CRTC vetoed their application to move to 530 or they just like the great groundwave on 530! (MB-ON)
790 WETB	TN Johnson City - 2/18 2210 - GOS, young sounding DJ stating "that they were staying on till 11:00 pm sign-off". Sounded a bit loud for 72 watts, but could have been auroral conditions, since no WTAR. (JK-VA)

DX TESTS

730 KWRE MO Warrenton - 2/18 0100-0130 - May have heard faint code at 0124, 0125 and 0126 under strong WPAL (103 watts HAI) and fair XEX, along with a "One on One Sports" UNID. (K-VA) ...Not heard looking under CKAC and Mexican. (RA-MA) ...No sign of them. (SF-TN) ...Nothing heard. (RT-NC)

750 KERR MT Polson - 2/20 0200-0230 - Yes! Two periods of code ID heard, one at 0226 and another around 0234. There was some CW heard beginning at 0216 and continued to 0315+...don't know who this was since an ID was never heard. I doubt it was KERR, but it fits...also present was Nicaragua with SS. MT #2. (RT-NC) ...Not heard looking for at least some TT or code, but no luck, just WSB and UNID CW music possibly from CKGB. Thought this had a good chance of making it. (RA-MA) ...Not heard, I don't think. There were bits of country music in there under WSB, but probably Timmins? (GC-NY) ...Somebody way under WSB with CW and EE regular-schedule style announcing, but nothing resembling a test noted. (SF-TN) ...Not heard, just Timmons, ON and JBC in WSB null. (DS-DE) ...A no show, too much WSB. (WPT-DC)

760 WWOL NC Forest City - 2/11 0200-0400 - Nop sign of them, although WZZX was on for a flood emergency until 0207. (SF-TN) ...Nothing heard except WBBM. (JL-OH) ...Not heard, WBBM rules the roost. (WPT-DC)

910 KIYU AK Galena - 2/6 0500-0530 - Possibly heard a 1 kHz TT at 0503 lasting for 3 or 4 minutes, hard to say with a very crowded frequency. (JL-OH)

920 CFRY MB Portage la Prairie - 1/30 0100-0130 - Poor in mess under dominant WHJJ with code IDs noted at 0122 and 0131. No CW music noted except from WMNL (MB-ON) ...Not heard. (WPT-DC)

1100 KNZZ CO Grand Junction - 2/12 0300-0330 - Not heard, tuned out early at 0312 to escape WWWE programming. KNZZ's code came in OK here on their 12/92 test. (SF-TN) ...Not heard, only WWWE with satellite driveline about kiddie cartoons. And the clears wonder why the FCC wants to take away their protected status. (JL-OH)

1210 KGYN OK Guymon - 2/13 0200-0230 - Not a trace. (SF-TN) ...Not heard, only WGMP. (WPT-DC)

1250 WREN KS Topeka - 2/14 0100-0200 - Faint but crisp code IDs heard under WTAE at 0113, 0117 and 0122. (SF-TN) ...Blasting in on top of the channel with code, religious music, "This is 1250 WREN", mentions of IRCA and what sounded like "Todd Brandenburg on the air live", station manager (ex-NRC member?), address, phone number for the fax machine, etc. WTAE totally wiped out! KS #2 in VA. (UK-VA) ...Not heard, only two UNIDs, talker and NOS. (JL-OH)

1320 WAMR FL Venice - 1/30 0130-0200 - A no show, only WJAS. (WPT-DC)

1420 KUJ WA Walla Walla - 2/26 0400-0600 - Not heard, just WHK and a stew of others. (SF-TN)

1580 KFDF AR Van Buren - 3/4 0200-0300 - Not heard. Didn't wake up till 0250 so that could be part of it! I did hear some weak EE stations but no tones or anything, and a station that went into CBS News at 0300, but doubt it was them. (GC-NY)

UNID AND UNID HELP

690 UNID 3/2 1917-1930 - Strong at times but some trouble from CBF (even though it was auroral, some groundwave sneaking in), and skywave overload. A station with "Hot Talk Radio" slogan. The talk show host may have been named C.C. Cooper, heard that name mentioned a few times. Phone # sounded like 267-9848 or something like that. Another clue may be that the host mentioned being Hispanic-American. Strongly suspect wanted WTIX, help! (GC-NY)

730 UNID 2/28 2329-0010 - Surprised to find not FF CKAC, and not SS XEX, but strong EE with the *Sports Byline* program, with an interview with a rookie from the Sacramento Kings. Went through 2330 with no local ad or ID. At 0000 the program ended, and the station just started beeping (beep beep beep etc.) with no local insert of ID. Listened until 0010 and gave up, as the beeping got old real fast! This was probably not that far as it was peaking fairly strongly, possibly E-W. What is going on here? (GC-NY)

970 UNID 2/16 2040-2050 - Heard with SS music and talk format over/under the WWSW, WWJD and WNED mess. Nothing listed which is even remotely possible. (RJE*PA)

970 UNID 2/20 1230-1300 - While NW of Newport, probably WESO-MA with hit music, fair signal. (JD-RI)

1000 WDJI AL Huntsville - UNIDs from both DB and DY are this station, ex-WTAK. After going black Gospel for awhile and a short stint back simulcasting AOR with their FM (WTAK) they went NOS around the end of December. They are using *Westwood 1* (an occasional closed circuit comment slips through) and the phrase "One thousand memories". (Clever...) They are //WPAD and WSAI when they are all using the satellite. I kept meaning to send the format change in and kept letting it slip by. Hope this clears up the confusion. (ES-AL) (Thanks for the help, Ed -db)

1050 UNID 3/2 1748 - Two calls sounded like WFBN, or WSV?, and/or a hundred other phonetic obstacles, satellite standards with "Great songs, great memories". Atop at sunset. Is WSEN standards? (BA-PA) (Yep, that's them -db)

1120 UNID 3/2 1759 - Beautifully fragile and weak but isolated SSB. Tuned in a minute too late. Made a nice tape. I will hunt this down with every resource in my system. (BA-PA)

1160 WYNS PA Lehighton - Was my UNID of 2/5 in Issue 21 with NASCAR. Now if I could figure out who the 1600 one was... (RJE-PA)

1200 WKRL NY North Syracuse - Probably R.J. Edmunds' UNID, as they just moved to this frequency and they are NOS (parallel to WTLB 1310 Utica). Not sure about calls but they are NOS I know. (GC-NY)

1290 WNBF NY Binghamton - Dave Evans' "WLDF" UNID I bet is this one. Calls sound the same and talk format fits, plus they get out well. (GC-NY)

1330 WADJ PA Somerset - 2/7 1736 - Was my UNID of 2/5, heard at this time with "Somerset County's racing station, WADJ" and mention of the 2/5 race. (RJE*PA)

1430 UNID 2/17 0039-0040 - Weak with NOS music, ID. Calls sounded like WMYF. I have a 12 year old Log so I have no idea about this one. (SP-VA) (How about WNAV? -db)

1510 WNOP? 2/3 1556 - Last letter of call either P or C, weather at 1558 'This is meteorologist Bob Cox for News Radio WNOP'. I don't have this one in my 14th Edition Log. QRM from WNRB (ex-WSSH), fair. (DP-PQ) (Maybe WNLC-CT? -db)

1550 UNID 2/6 0410 - Sport Tomorrow talk program, 1-800-365-PLAY to call them, ad for Metrics performance food, ad for NFL Video, humming sound at 0448 (probably CBE's OC) and at 0458 CBE took over with the national anthem. I think the host mentioned that this program was only broadcast the morning after Saturday and Sunday. Poor-good, looped E-W. (DP-PQ)

1550 UNID 2/17 0645-0650 - Heard with SS music and talk format and several "Cinquenta cinquenta"s. While this doesn't literally translate, I've heard LAs use a similar sort of slang for the frequency. WNTN or WRDM? (RJE*PA) (Yes! -db)

1570 UNID 2/6 0730 - "Real Country News" slogan at 0733 into CW songs. Poor. (DP-PQ)

1570 UNID 2230+ - UNID FF music program with male announcer faded in over WPEP, then gone after a minute of talk with FF song at 2234. Could this be a new PQ station? (AR-MA)

1570 WBUX PA Doylestown - This could be DY's UNID from 2/7, now IDs as "The Bucks County Connection" and has basically dropped the 70's format for local talk and some AC/oldies music. (DS-DE)

1570 WBUX PA Doylestown - DY's UNID item in No. 21 is not WBUX. Maybe a parallel somewhere? (RJE-PA)

1590 WETT MD Ocean City - As of 2/23 this station is still silent. Suspect DY's UNID of 1/22 is WKTP (simulcast of WKPT-1400). (DS-DE) (Stole my thunder! I was in OC on 2/22 and they were indeed off - like you needed me to tell you that now! -db)

1600 UNID 2/6 1745 - CW weak under WBFD, WJQI and WPDC when disappeared. (RJE*PA)

1600 UNID 2/6 1730-1745 - With "Southern Gospel" (or perhaps "Solid Gospel") bird-fed program over/under WBFD, WJQI WPDC and UNID CW. Not WHOL nor WJSA, both already "gone". (RJE*PA)

1600 UNID 2/28 1812-1816 - With NOS, the "Unforgettable music for the...Valley W...", sounded phonetically close to "WFTK" but, of course, nothing matches. Does that wording ID it for anybody? (RJE-PA) (Probably, but I'm not one of them! - db)

0000 to 0800 ELT

540 WWCS PA Canonsburg - 2/14 0550-0601 - Fair in mix with SS UNID talk station and UNID CBC FF station with EE woman hosting program with accordian music. Time pips heard at top of hour, followed by "WWCS" call letters in cultured voice in place of GMT announcement. (AR-MA)

550 KUSA MO St. Louis - 2/27 0215-0245 - Intermittent but strong at times just under strong local WGR. This one shocked me. Satellite adult standards music, ads, slogan that sounded like "from St. Charles to St. Louis". Calls sounded like KUSA, not KSD, call change? Still on day pattern? Ice on the towers? New. (GC-NY)

WCKY OH Cincinnati - 2/20 0459 - Very poor, interview with either nutrition or diet author, finally heard on this frequency. (JH-NJ)

600 WICC CT Bridgeport - 1/31 0000 - ABC News, ID at 0006, CIQC QRM. (DP-PQ)

680 CKXG NF Grand Falls - 2/3 0054 - CW music, news, Travis Tritt song at 0119, "This is Kix Country" slogan at 0121. Weak under CFTR in WRKO null. NF #2. (DP-PQ)

690 WTIX LA New Orleans - 2/14 0105 - Good with NBC News, "WTIX" mentions and then talk. (JK-VA)

740 WVLN IL Olney - 2/27 0153 - In decently this AM over CHCM with CBL off with promo for "Man or Woman of the Year" in Olney, sponsored by WVLN/WSEI, into country music, new. (GC-NY)

CHCM NF Marystown - 2/20 0245 - With good NE conditions this evening-some jingles, contest promo, and hot adult contemporary music, alone on the channel with CBL off, weak but steady. New, and if I am not mistaken I think this completes the Canadian provinces for me (I think I heard CBU and CBX before, can't remember now) (GC-NY) (Congrats! - db)

1000 CFLP PQ Rimouski - 2/20 0215 - WMVP was off (but this was heard in there earlier with WVMP on, good conditions to the NE tonight), dominating the channel with a SS far under, and very briefly, an EE talker that seemed to be WNW/ESE, KOMO? I'll never know... (GC-NY)

Foreign DX Catches. Times are UTC; for ELT, subtract 5 hrs.

Up-coming IIXD deadlines: Sundays MAR 26, APR 9, MAY 7, and JUN 4. Material received after these dates may be held until the next edition. As I type up the first round of this column, we've already got one of the biggest of the year, and we still have another week before deadline! So DX News may slow down in the spring, but DX is still going strong.

Abbreviations are confusing to non-English speakers who read this column, so I try to limit my use of them. I will print your e-mail address if you request it with each submission.

Welcome to new reporter Matt Sittel, known to many for his FM/TV contributions in the Worldwide FM-TV DX Associations' *VUD Digest*. The secret is hereby revealed to the world that Matt likes AM! And with Greg Congilio reporting here too, we wonder if we are witnessing the beginnings of a widespread defection from FM to AM?

Morris Sorenson sends loggings from his recent visit to Jamaica, and has an answer for those who've been wondering where Caribbean Radio Lighthouse is ... it's moved to 1160 from 1165 kHz!

- Greg speaks: "I hear more hets though no audio, that 891 is there almost every night, but just can't get any audio."
- Mark speaks: Conditions for high-band Spaniards have been superb from 0400 to 0600 UTC the last few nights. On (UTC) 28 FEB at 0500, the graveyanders on frequencies such as 1485, 1575, 1584, and 1602 were in at such phenomenal strengths that reception clear across Canada & the USA should have been likely. Denis speaks: "I received my Quantum loop 3 weeks ago and am very pleased by its performance .."

Greg speaks some more: "FEB 23 also brought a SS all alone on 760, likely Radio Coro, Venezuela, if past experience serves. And surprisingly, 1120 was a weak SS station all alone without KMOX. Couldn't figure this out with all the CKTY slop - must have been something good as I have never heard SS on that frequency before! Strange night - Sounded auroral, but yet some stations to the NE, like Montreal, CFLP 1000, CHTN 720, etc. were blasting in, so who knows? MARCH 2nd was an excellent auroral night, strong enough to knock all the northerners out, but not so strong to keep everything out. Was an amazing domestic night, with perhaps the pinnacle being WYNK-1380-LA. Plenty of SS where it is not often heard (2 of them on 690, 830, 1130 after GA sign off, etc.), but I couldn't pull out IDs on any of them. Hope people did well that night! (I have heard Venezuela and Puerto Rico on 1120, there is also a SS Florida station there too - Jim)"

QUERIES AND ANSWERS

Though not directly resolving Rick Dau's question about Radio Taino frequencies, the following are selected observations as personally monitored here. Note that I was the first to hear this station from nearly the first day of broadcast. 1180 continues to come in local level daytime here, with much EE programming mixed in.

11/5/85: I was the first to hear/discover Taino as a result of a Radio Havana Cuba news item, announcing the opening of the station for tourists. Sked was announced as 1200-2300 GMT on 1160, as this was promptly confirmed. 6/19/88: began announcing 760, 1040, 1160 (but 760 unheard). 7/27/88: 830/1040/1160 now in use and all three heard for the first time in parallel. 1988-1989: R Moscow World Service irregularly appears on 1040. 10/15/89: 1100 noted for the first time, alone. 3/24/90: 1040/1100/1160 noted all in parallel. 3/27/90: TV Marti begins broadcasting from a balloon over Saddlebunch Key. 4/22/90: 1180 first appears, but initially only in use when TV Marti is on, switching back to 1160 other times. Soon after, 1180 becomes more regular. 4/7/92: 830/1100 heard by Krueger and Crawford relaying RHC in English that night, while 1180 continued with Taino. 2/27/95: 1180 continues as the regular Taino frequency, but 1100 is occasionally reported still active in parallel as well.

Taino 1180 remains local level daytime here with much EE programming. I QSLed R. Taino several years ago, and presume they'll still reply. Most of the Taino announcers are actually the RHC SS and EE staffers. The name Taino is derived from the native (related to Arawakan) peoples that lived in Cuba and Hispaniola. Does anyone out there have a complete listing of the Taino FM

frequencies? I've never fully copies the irregular Spanish cast, which gives four or five-ish channels. Would like to have these on hand for E-skip and tropo DX openings [Terry Krueger/DX South Florida via Rick Dau and direct]

UNIDS

Olle Alm sent a list of European frequencies in use. The 183 kHz signal that some have reported is probably Europe 1, with 2000 kW, 0400-2200 M-F, 24 hours SaSu. It is listed for 180 kHz, but operates on 183 kHz. It is the very last listing under Germany in the 1994 WRTH, shown as 183 kHz, although the back of the book shows it operating on 180 (177). George McLachlan also pointed out the discrepancy in the listings.

CORRECTIONS

Re Bruce Conti's 1053 Talkradio noted in the last column, phone number should be 0345-105389 (not 8345) - an 0345 call in the UK is a call charged at local rate irrespective of where the call originates. [Whitt-UK]

STATION NEWS

BELGIUM: RTBF has reactivated two of their MW transmitters which have been silent since JUN 1993. From FEB 20 RTBF Radio 2, now known as Frequence Wallonie, reappeared on 1125 kHz from La Louviere and on 1233 from Liege. These are test transmissions on low power. RTBF are checking the equipment in view of possible use by other operators, French notably. [Frederick Gordts via Steve Whitt e-mail FEB 28]

BELGIUM: Deutsche Welle are to use Wolvertem 1512kHz for broadcasts possibly in Dutch. [Remy Fréres via Steve WHitt e-mail]

COLOMBIA: R. Ideal, Umbita (Boyaca) 1623.5 is a new pirate heard quite well regularly in early January. They announce their frequency as 1650. [HK in SWB in ARC FEB 17] (the reporter lives in Colombia - Jim)

GUATEMALA: "There is now a network relaying TGRT 670 Guatemala City. The network name is "Emisoras Unidas" (United Stations) and they mention a long list of stations throughout the country that carry the network but I never copied it. Other news: TGRV R. 560 is actually on 550; they continue to announce themselves as "Radio 5-60" however (noted as such in 94 WRTH - Jim). TGW 640 was not heard at all during my 17 days in Guatemala, not heard either during my trips to Guatemala for the last 4 years so obviously gone. TGHB 760, TGO 790, TGX 850, TGWC 1000 (relay), TGRR 1150, TGTL 1310 (listed as inactive on 1300 in 94 WRTH), TGRP 1410 (1420 in 94 WRTH), and TGWC 1600 (inactive in 94 WRTH) were not heard at all. TGVA 1060 was parallel to R. Sonora 1180 every time I listened. TGTU 1270 was heard with the slogan "La Voz de Los Altos" (shown as 1310 in 94 WRTH). TGLK 1360 was heard with the slogan "La Tic Tac" (as in 94 WRTH). TCGH Quetzaltenango has moved to 1460 with the same "Radio Xelaju" slogan (shown as 1410 in 94 WRTH). TG?? 1490 La Voz de Atitlan, Santiago Atitlan (new station) was heard in both Tzutuhil and Spanish (announcer says each sentence in both languages); mention was made of shortwave frequency so I assume they are parallel. TGDX 1510 was heard announcing 24 hour service but I did not care to verify this personally." [Hutton-SPAIN] (Chuck notes that he only had the 1993 WRTH as a reference).

MEXICO: Radio Formula network station list: 650 XEVG Merida, 720 XEAJR Veracruz, 740 XEBAJ Cancun, 780 XEMTS Tampico, 810 XEAGR Acapulco, 880 XEV Chihuahua, 950 XEKAM Tijuana, 970 XEDF Mexico, 1000 XENLT Nuevo Laredo, 1060 XEFNA El Paso, 1070 XESP Guadalajara, 1150 XERM Mexicali, 1200 XEFY Hermosillo, 1370 XEMON Monterrey, 1370 XEHF Nogales, 1470 XEACE Mazatlan. There are 15 other stations (not listed by network) which carry some Radio Formula programming. Stations which air Radio Formula's al night talk show read the above list over the air a few times per night, often around 0800 or 0900 UTC. Best chance for a local ID is around 0600 or 0700 UTC (+/- 5 minutes) [ARC FEB 17 (they credit NRC for the item, but it wasn't from here! Jim)] (I think I heard this network give the list at 0600 on Mexicali 1150 while in San Diego during Christmas Jim)

NORWAY: The Norwegian Fishery Minister stated on FEB 17 that a new MW transmitter will be built on Bear Island (Bjørnøya), south of Spitzbergen to increase coverage for fishermen in the Barents Sea. No Norwegian MW transmitters are able to cover this area, and fishermen complain that weather reports and messages from the fishery authorities are impossible to obtain. No further details so don't expect transmissions until next year [Bjarne Mjelde via Steve Whitt e-mail]

UNITED KINGDOM: Mystery signal on 2404.5kHz is G9CDP, a test & development station experimenting with LF antennas - NOT a pirate harmonic! It is located in Chapel Green near Sheffield. Reception reports will be welcomed by Bessemer Broadcasting, 52 Hampton Road, Fir Vale, Sheffield, SS 7AN. Comparison of reception when different transmitting antennae are in use

would be useful. Future tests will use 1413kHz & eventually a LW frequency. [Bessemer Broadcasting via Steve Whitt]

VENEZUELA: "Radio Nacional de Venezuela. Again they have plans to reactivate one of 500 kW transmitter located in Punta Tumatey, Falcon State, broadcasting RNV light channel programming. According with personal conversation with Lic. Pablo Carreto Ydrogo, current general director, they are waiting only the appropriate electric energy in the area to sign on the transmitter on 1240 kHz. The other 500 kW transmitter is installed yet in Punta Tumatey but they have plans to move, probably to Santa Elena de Uairen in Bolivar State." [Manuel Rodriguez Lanza in Tropical Tuning #38]

Changes in programming status; reported by listeners

A flurry of format changes...from Pete Taylor, KFSO-560, San Francisco, "560 Hot Talk" has dropped its liberal talk show hosts in favor of a conservative talk format, thus ceasing to insult one group of people in favor of irritating offending another entire population. And while DXing, your editor has discovered that WVAM-1430, Altoona, now offers all talk with local news blocks including morning drive "AM Altoona" and for PM drive, "Altoona's Afternoon Edition". This was confirmed by a nice vene from the CE who "loves reception reports", after seven tries by me in the past decade. WPGC-1580 "Flava" has dumped business news in favor of rap (should have done the business news IN rap to be the ultimate in obnoxiousness!). Additional DXing reveals that WPUV-1580 is now southern gospel, and WNRB (ex WSSH)-1510 has dropped Spanish for contemporary Christian and is "Boston's Blessing" (yechi). Local WNLK-1350 has dropped its adult standards for talk "The New Talk of Fairfield Country".

While en route to New Hampshire, I checked out WJIB in time to again hear "Let's Talk About Radio" on 2-26, to hear a group of you doing just that. Of interest for this column, from LTAR is that WKNE-1290, Keene, NH, has dropped the talk format for oldies and WBMA-890 is now WBPS for Boston Prime Sports - the Spanish religion has gone, replaced by automated sports talk, only four dial positions from powerhouse WEEI-850, Beantown's real sports station. WBPS is moving its license to Wellesley Hills, although the studio reportedly is still on Commonwealth Avenue, in Boston, and the station uses the old WBIV five tower array near Framingham. George Greene, visiting the area from Ohio, was on the program, fresh from a trip to Australia, where he noted that the broadcast consultants that have brought "Q", "Z", "Zoo", "Kiss", "Foxes" and "Hot 100's" to the US must be working down under, where the dial sounds the same as it does here. Some stations in the Alice Springs area are owned by Aborigines, although the formats of these stations are of the variety nature. This program is VERY interesting, and it is too bad that we can not hear it.

The column is primarily from the *M Street Journal*, and from Dave Schmidt. Note all of the changes to adult standards, sports, religion....and automation!

All for now, with thanks to our contributors. "Let's Talk about Radio" raised a provocative question...if you could receive ONLY three radio stations in your area, and three alone, what three stations would you most want to hear? So, in Formats, let us adopt the question in a little reader survey. Please send on a card to me, your three favorite local stations. I will publish the results in a later formats column. By the way, my three selections in NYC are WCBS-880, news, WYNY 103.5, country, and WMXV-105.1, hits of the 70's thru 90's. In Boston, my home away from home, they would be WBZ 1030, news, WBCS-96.9, country music, and WJBZ-740, easy listening. WADN-1120, folk and BBC, and WCLB-105.7, country would be runners up. And, in Fairfield, WICC-600, news and info, WXYZ 92.5, country, and WEBE-107.9, mix of 1970's thru '90's. Conversely, electronic purgatory would be the three stations airing business news, rap, and motivational talk - what a thought! And what are YOUR favorites? 73's!

IRCA Mexican Log, 3rd Edition

The 1994 edition of the IRCA Mexican Log lists all AM stations in Mexico by frequency, giving call letters, state, city, day power, night power, slogans, schedule in UTC/GMT, formats, networks, and notes. Stations that have changed frequency since 1990 are cross-referenced on the old frequency.

The call letter index gives call, frequency, city and state. The city index (listed by state, then city) gives frequency, call, day and night power. There is even a guide to the Spanish alphabet and numbers.

The log has been completely updated from the 1990 edition and carefully cross-checked by IRCA members in Mexico and the U.S. This will be an indispensable reference for anyone who hears Mexican radio stations.

The price, payable to IRCA in U.S. funds, IRCA/NRC Member: \$6 U.S./Canada/Mexico/Seamail; \$7 rest of the Americas airmail; \$7.50 Europe/Asia airmail; \$8 Australia/New Zealand airmail. Non-Member: \$8 U.S./Canada/Mexico/Seamail; \$9 rest of the Americas airmail; \$9.50 Europe/Asia airmail; \$10 Australia/New Zealand airmail.

RAC6790GM (R-2174(P)/URR) Noise Blanker - by Dallas Lankford

I attempted to increase the RF blank time by raising R11 to 1 Meg ohm (in which case the circuit "died," I am not sure why). The RF blank time is given by the equation $T(RF) = 157 \times 10^{-12} \times R13$ microseconds. For the 330 K ohm I used, $T(RF) = 51.8$ microseconds. This is a bit longer than the 33 microseconds used in the BB NARROW pulse blunker mode. The audio delay time $T(D)$ is given by $T(D) = 143 \times 10^{-12} \times R5$ microseconds. With 1.5 Meg ohms used, $T(D) = 214.5$ microseconds. The audio blank time $T(AUD)$ is given by $T(AUD) = 2.2 \times R6 \times C7$ seconds. With 100 K ohms and 3300 pF, $T(AUD) = 726$ microseconds. These delay and audio blank times are about what are used in the R8.

The noise blanker was built on a 4 1/2 by 4 11/16 inch PC board which was mounted on four metal standoffs tapped for 6-32 screws, between the 6790 IF board and the rear panel. SMB connectors were used at the input and output to preserve the appearance of the 6790, and small pins and connectors were used to make the audio connections and +15 VDC connection. To make the +15 VDC connection, L4 was removed from the 6790 IF board, and a small PC board adapter was made which contained L4, and a pin for +15 VDC, and which mounted in the holes vacated by L4. After C85 was removed, small pins were mounted in the vacated 6790 PC board holes (for quick connect and disconnect of the noise blanker). The mini-coax from the output of the 2nd mixer board to the input of the IF board was re-routed to the vicinity of the four standoffs, which required the 6790 power supply subchassis to be moved (but not removed). And an appropriate length of mini-coax with right angle SMB connectors was fabricated to connect the output of the noise blanker to the input of the IF PC board. A rectangular metal plate on the 6790 rear panel was removed, and another metal plate fabricated and used to mount a miniature toggle switch on the rear panel for turning the noise blanker on and off. The original 6790 metal plate was saved in case I decide to restore the 6790 to original. With this approach, the noise blanker can be removed in about 30 seconds without any unsoldering.

The 25 K ohm pot is a threshold adjustment, and is set to 25 K for the 6790. The attenuator (R1 and R2) was not needed, so the two resistors R1 were omitted, and R2 was merely a solid wire jumper. The broadband matching transformer T is an Amidon FT-50-75 with 31 turns and 5 turns of #26 enameled copper wire, close wound, with the 5 turns at the center of the 31 turns. The ULN3846A was socketed.

It is believed that a similar circuit can be used to provide noise blankers for many top-of-the-line DX receivers, such as the R-390A, 51J-4, and NRD-525.

Testing of the circuit is not complete, but preliminary results are very encouraging. As yet, I have not experienced any episodes of bad pulse type noise which occasionally occur at my location, so it has not been possible to give the noise blanker a thorough testing. However, the noise blanker has been found effective against fluorescent lights (when I turn them on and can find the noise at sporadic frequencies on my noise reducing vertical antenna) and against the usual pops and clicks at lower frequencies. Fluorescent light noise is not completely eliminated, but on weak AM signals it is greatly reduced. The Allegro data sheet mentions that the 3845A and 3846A chips are also effective against ignition noise and light dimmers. I have not tried the noise blanker on either of these two types of noise.

MATT SITTEL - BEAR CREEK LANE, APT A4 - ASHEVILLE, NC 28806

* * * * * Hi! I'm a new NRC member, and I thought I should introduce myself to the club. I've been active on the AM band on/off through the years, most recently, my foray into the joy of AM DX came when I was living in Tallahassee, FL and about a month before leaving decided I should give the AM band a try so if anyone asked I could tell them what AM DX was like there. Well, in a month I racked up just over 200 stations, with enough Radio Reloj loggings to last me a lifetime! A couple have followed me N though, which is fine since now I'm working on a new log, already over 100 in the 2 months I've lived here, which isn't bad considering most of it came during about 10 days of DX. I've just purchased a GE Superadio III which I'm very impressed with, it runs rings around the Panasonic boom box I was using. The car stereo in my 91 Ford Tempo gets used sometimes on the drive to/from work. I guess I should introduce myself from that standpoint, too. I'm 24, & I work for a contractor as a meteorologist for the National Climatic Data Center, which suits me perfectly since I majored in Meteorology and minored in statistics, so there's plenty of number crunching to do. I just got a home computer and being on Compuserve where I can do some Email at home instead of work, plus I can send in reports, too! It's great to see the technology already in use in the NRC! I've been a member of WFTDA for almost 10 years now and the technology is just starting to be used for reports and other information. My 1st loves will always be TV & FM but with the Superadio, I'm hooked for the time being on AM and hope to have some good catches to report to DDAD-B in the near future. 73s (And a very big welcome to you, Matt, to the NRC. We will look forward to your contributions)-DWS)

* * * * * Greetings from the Great White North, home of the Maple Leafs, Blue Jays & a whole host of static & noise, both known & unknown! Its been a season well worth the DX as I have been away from it for 16 years but the noise has increased 5 times over since the 70's, or maybe it is my new location next to the transmitters of CFBB, CHUM & CBL! As planned, CJCL (The Fan) moved down the dial to 590 kHz at exactly 12 noon 2/6, CKYC-590 pulled the plug 2 hours earlier when a certain newscaster was just about to go on the air! No goodbyes, no thanks for supporting the station for all of these decades. Someone in management just pulled the plug! This according to a source from CKYC working there during the last week of preparation for the change. CJCL-590 now calls itself "Canada's Sports Superstation" a vast improvement from 1430 to 590, the signal is booming in as far N as Sudbury and as far S as N PA. Maybe I'm too sentimental but CKYC/CKYC but a decent, proper burial was called for here for a former 50000 watt giant, but nothing, not even a newspaper write up! That's it, 73s & good DX til next time!

* * * * * * * * Well another successful DXpedition to Valhalla Beach has been completed. We had a great time once again and with the improved insulation of our still being converted school bus, we were warm even with temps dropping to -20 or so. A couple of other trips were cancelled due to temps around the -30 range making leaving the car outside for 12 hours not advisable. The walk of about 1500-1600 feet was a bit of a hike due to snow that was ankle to keep deep. Of course, the snow was waist deep by the bus just to insure we had a good work out. We did manage to get a few new ones and ended up with some mystery stations, such as 2 beacons on 1641 & 1680. Then there was the logging of KQRS on 1700 which still has us scratching our heads, we figured we had gotten the 1st new station in the expanded band until we found out they had not asked to move. Its loggings like that which keep us going. Thats it for now. We have to get some of you S DXers up here one winter for a DXpedition, bring your warm clothes and we will let the DX flow, the colder it is, the better the DX will be! 73

TONY FITZHERBERT - 356 JACKMAN AVENUE - FAIRFIELD, CT 06432

* * * * * Greetings, time for another Muse. DX at sunset has been great here with some new catches, in this land of local stations all around you! Heard for the 1st time have been WFKJ-890, WIOO-1000 (in like one of the area locals!), WMYP-1540, WRNJ-1000, WEIZ-670, and rolling in over KYW-1060 was a weak signal from WCOR. A call to WCOK prompted amazement from Jaylene Warden. She was surprised that the signal made it out "over the mountains", let alone to CT, as they are only 800 watts & "have to go off the air at 6PM because of some big station in Philadelphia". Ah, the surprises of this hobby! Veries are rolling in from WRDM-1550, and a detailed letter from WCOG-640, whose signal came in here very weakly.

The verie of the season so far is from WVAM-1430, after 7 tries over the years. Their FM's call letters fascinate me, WPRR, for the old Pennsylvania Railroad, as Altoona was the location of their primary maintenance facility. The USPO returned my report to WFTH-1590, another chronic non-verifier. I hope DX holds up for all! Here, Fairfield County's former big full service station, WICC-600, is advertising during AM/PM drive for people to buy blocks of time for their own shows. At one time, WICC was THE top station in Fairfield County. Several of you have written to say how much you are enjoying the Station Profiles. Thank you very much for the notes, which I hope to answer in the near future (like a CB with reception reports!). I appreciate them greatly. 73's

BILL ANDRES - 719 W. JOHN STREET - FRACKVILLE, PA 17931

* * * * * House remodeling and extra hours at work have cut into the dial time, and with me getting home near 3AM, that swell DX TEST calendar has really fled by like an unopened gift with a time expiration. I missed enough of them to get left back some renewal time! Really nice job, that schedule was, with pretty faithful results as evidenced by the DDXD contributions. Even when the TESTS aren't heard, some valuable facts emerge via the formats of the 'pests' and 'unn's' in the way. It'd be good to see a column based on a club-wide tune in to a specific frequency every so often, Test or no, to see what emerges. 1400 might not be a good choice but maybe some of the regionals or the class II clears. Semi-local WMIM-1590 (and I avail of the term in the broadest sense of usage) was noted back on 2/7, well past sunset. The format, a live but liberally segued drone, purports to be easy-rock of the 70's sort, with Glen Campbell lauded as the core artist. (special on cut-outs this week!-DWS) Despite this reappearance, they've been off the air more often than on, Tuesdays seem to be when the station is heard most frequently. In any case, since the totals started at 0/0/0 with the new location here, it is quite rewarding to tune in some broad-daylight midday and hear 6 new ones in a half hour. The furthest was an ID from WNRK-1260 with oldies under WBDU 2/24 1:30PM. The stock Zenith is all that's hooked up for now, temporarily no loop because of - ahem - space management, so nulling has become once more the black art it'd been long ago. It's often a matter of waiting for a satellite station in front to trip over its shoelaces and provide vast expanses of dead air. ID's from WVAM & WENE 2/25 7AM completed the domestic frequencies. UNID Radio Reloj on 890 with what sounded like an 889 het 2/27 1:18AM. Later and all night seemingly, was WKGM-940 "The Ministry Station" atop 940 very well. An elusive but loud religious station on 1410 I've been trying to flag down turns out to be WLVV "The Sound of Love" with an ID 12AM 3/1, 1st AL from here, but their pattern in the book doesn't warrant these levels not with WPDP/WDDV and a half-dozen others in the way. Perhaps the heavens look after the religious U2's who forgot to throw the switch? 73

DAVE SCHMIDT - P O BOX 11502 - WILMINGTON, DE 19850

* * * * * We should have a report on the Kulperville doings next report. Again, it looks like a pretty good group of NRCers will be on hand. The DX TEST from WKEK-1250 on 3/6 made it, weak to fair at times, between 1 till 1:20 AM, code and even a few voice ID's. Strange feeling to walk around a station transmitter sight, having not heard it in the past, then have it show up through some mode of operation. The test from WPPI-1330 was also copied 3/4 between 5 & 5:45 AM. Once WFBC faded about 5:35AM, WPPI was pretty much alone. Bill reports he ran a total of 40 minutes worth of code ID's during the time he was on! Yes, a verie arrived from the WNDM-1300, which I believe is \$1090 for me. I received a copy of the new book on the Zenith Trans-Oceanic, written in part by Harold Cones (ANARC), of which we may write up a short review. That's it for this time, CUN14 & 73's

Are you expiring?

We hope not! To avoid expiration, mail your remittance to the DX News Membership Center early. Allow at least three weeks after mailing your check or money order for new renewal data to appear on your mailing label. Please provide full nine-digit ZIP numbers, too.
